

Bridgemate App

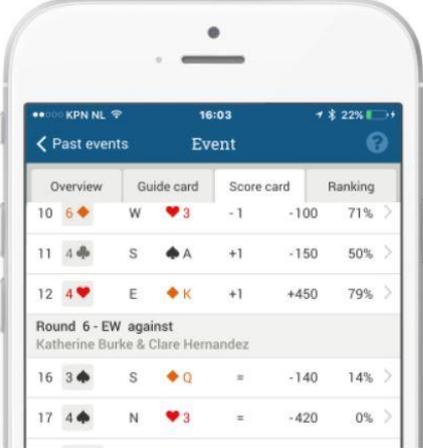

The Bridgemate App is now available for members to download and use at Stratford St Mary Bridge Club, with full functionality including the hand records and analysis. The App is free from the Apple App Store on your iPhone or Google play on your Android Smart phone for the first 6 months or £3 per year thereafter.

Once you have installed the App on your Smartphone and have completed registration, it acts as

- your automatic personal score card, in place of the paper score card.
- a seating/table guide card.
- ranking of all pairs as the evening progresses.
- individual hand results.
- hand records with the optimum contract/score.
- hand analysis allowing it to be replayed.
- a summary of your declarer/dummy/defender performance

The analysis is particularly useful to players who want to try and understand why they didn't make that contract, or perhaps they allowed the opposition to make an extra trick or two in No Trumps. Whilst the online Real bridge platform allows you to replay a hand exactly as it was played during the game, the Bridgemate App allows you to play it differently to see where you may have gone wrong!

Examples of the screens you'll see in the App.

The image shows a smartphone screen with the Bridgemate app open. The screen displays a table of bridge event results. The table has four columns: 'Overview', 'Guide card', 'Score card', and 'Ranking'. The data is as follows:

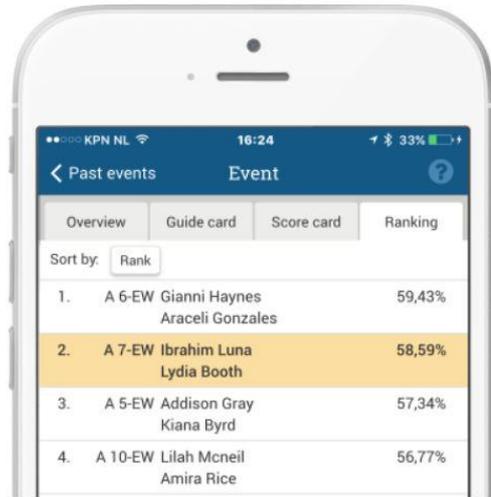

Overview	Guide card	Score card	Ranking
10 6♦	W ♥3	-1	-100 71%
11 4♣	S ♠A	+1	-150 50%
12 4♥	E ♦K	+1	+450 79%
Round 6 - EW against Katherine Burke & Clare Hernandez			
16 3♠	S ♦Q	=	-140 14%
17 4♣	N ♥3	=	-420 0%

Personal score sheet

See the scores entered on the Bridgemate live on your smartphone. Lead cards are also displayed, and board percentages are updated continuously.

Rankings

Rankings are periodically updated in the app throughout the game. As soon as the game ends, final rankings become available.

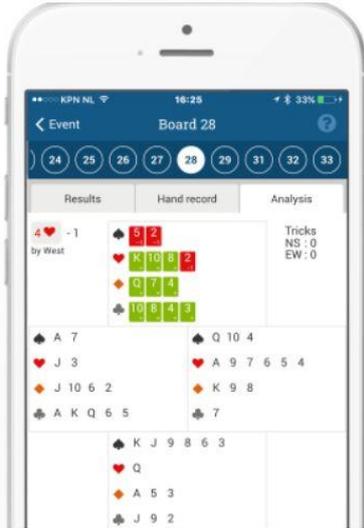

Your opponents' scores

View your opponents' results on the boards you have played. A complete overview of contracts with lead cards is displayed.

Hand records

When hand records are available to the Bridgemate system, they are displayed in the Bridgemate app. An overview of makeable contracts, based on double-dummy analysis, is also displayed.

Analysis of your game

Replay your game and analyse the best play using the in-app game analyser. By using double-dummy analysis, the app indicates how each possible card you could play would affect the final board result.

Read a [hands-on example](#) of the double-dummy analyser in the Bridgemate app. Example provided by The Bidding Box, Pinecrest, Florida.

Guide card

With the Bridgemate app, your personal guide card is always on hand during the game. You can discover who your opponents are, which table you are playing, and whether or not you have a bye.
